## CAREER OBJECTIVE

---

To continue my career with a stable and profitable organization, where I can be a member of a team and utilize my development experience to the fullest.

## EDUCATION

---

### Bachelor of Engineering

2019-2022

North Maharashtra University, Jalgaon

CGPA: 8.28/10

## TECHNICAL SKILLS

---

**Programming Languages:** Java, JavaScript

**Platforms:** ReactJS, NodeJS, Microservices, Feign-Client

**Databases:** PostgreSQL, MySQL, MongoDB

**Frameworks:** SpringBoot, Spring-Security, Spring-Data JPA

**Tools:** Swagger API, Postman, AWS EC2, Elastic Beanstalk, AWS RDS, Docker, GitLab, GitHub

**Markup & Styling:** HTML5, CSS, Bootstrap

## EXPERIENCE

---

### Next Wave Soft-Tech Private Limited

June 2022 - Present

*Software Developer*

- Oversaw migration of the monolithic application to **Microservices** using **SpringBoot** and **REST-API**.
- Led the implementation of data validation within a Spring Boot module, ensuring data integrity and reliability in the microservices architecture.
- Spearheaded the task of retrieving data from Excel sheets and persisting it into the database as part of a sprint assignment.
- Improved the API response time implementing SpringBoot's caching mechanisms and optimizing database queries. Experienced working in backend technologies and delivering defect-free code.
- Designed and developed a RESTfull API using Spring Boot with Maven, integrated with a PostgreSQL database, resulting in increase in data processing speed and reduction in API response time.
- Collaborated in a team-based, **Agile** environment to accomplish objectives by deadlines.

## PROJECTS

---

### Retail E-Commerce Site

*Technologies: Microservices, Spring Boot, Maven, MySQL, ReactJS, Feign-Client*

- Developed an E-Commerce platform catering to the retail domain, aimed at providing a seamless shopping experience for customers.
- Utilized microservices architecture implemented with Spring Boot, facilitating scalability and modularity.
- Integrated various technologies including Maven, MySQL, ReactJs, and Feign-Client to ensure robustness and flexibility in the system.
- Implemented features such as product catalog management, user authentication, order processing, and payment gateways to enhance user satisfaction and optimize business operations.
- Additionally, conducted thorough market research to identify consumer trends and preferences, informing the development of tailored functionalities and user experiences.

## GST Billing System

*Technologies: SpringBoot, ReactJs, MySQL*

- Developed an online GST billing platform using Spring Boot and ReactJS for backend and frontend respectively managing transactions, and ensuring compliance with taxation regulations.
- Automated invoice generation with tax and discount calculation.
- Integrated client management for easy retrieval of customer data, enabling quick retrieval of client data during invoice generation.
- Implemented email notifications for instant invoice delivery.
- Included financial reporting for business insights.
- Utilized MySQL for secure data storage.
- Designed with a scalable architecture and followed best software development practices.

## INTERNSHIP

---

**Hitachi Astemo India**

Sept 2019 - Sept 2021

*Internship Trainee Associate*

## EXTRA-CURRICULAR ACTIVITIES

---

National Conference On Innovation in Science, Engineering And Management (NC-ISEM-2k22) presented a paper entitled "Fabrication Steps of Gas Trolley with Weight Measuring Components", awarded Best Session.

## CERTIFICATIONS

---

**Full Stack Java Developer Certification**

Full Stack Java Developer, Pune

*January 2022*

Certification covering comprehensive skills in Java development, encompassing both front-end and back-end technologies. Equips individuals with proficiency in building robust, scalable applications utilizing Java frameworks and libraries for both client-side and server-side development.

**ReactJS Master Class**

Scaler Academy

*Date - 13-02-2024*

- Participating in the React master class sharpened my skills and deepened my understanding of advanced React concepts, empowering me to build interactive web applications with confidence.

## STRENGTHS

---

Self-confidence, positive attitude, hard work, leadership qualities, problem solving, self-discipline, adaptability to new environments, quick learner.

## DECLARATION

---

I hereby declare that all the information furnished above is true to the best of my knowledge and belief.
